EquityTrading domain model

User
- email_address *string* • *U*
- name *string* •
- password_digest *string* •
- phone_number *string* •

Instrument
- exchange *string* •
- exchange_token *string* •
- identifier *string* • *U*
- lot_size *integer* •
- name *string* •
- raw_data *jsonb*
- segment *string* •
- symbol *string* •
- tick_size *decimal (10,5)* •

SolidCable::Message
- channel *binary (1024)* •
- channel_hash *integer (8)* •
- payload *binary (536870912)* •

ApiConfiguration
- access_token *string*
- api_key *string* •
- api_name *integer* • *U*
- api_secret *string* •
- oauth_authorized_at *datetime (6,0)*
- oauth_state *string*
- redirect_uri *string*
- token_expires_at *datetime (6,0)*

Holding
- broker *integer*
- data *jsonb*
- exchange *string*
- trading_symbol *string*

Screener
- active *boolean*
- name *string* •
- rules *text* •
- scanned_at *datetime (6,0)*
- scanned_master_instrument_ids *integer*

Session
- ip_address *string*
- user_agent *string*

Strategy
- description *text*
- entry_rule *text* •
- exit_rule *text* •
- master_instrument_ids *integer*
- name *string*
- parameters *jsonb*

MasterInstrument
- exchange *string*
- exchange_token *string*
- ltp *decimal (10,2)*
- name *string*
- previous_day_ltp *decimal (10,2)*

InstrumentHistory
- close *decimal (10,2)*
- date *datetime (6,0)* •
